PAVER AND PLANNER PADS

The Duraline Plus range of rubber pads for paving and planer machines has been developed specifically to meet the demands of an industry where downtime is extremely costly. These are available in a number of different size and material options, including different fitment methods.

The range includes EPS, rubber and polyurethane bonded pads, in bolt-on, chain-on and clip on styles.

We also hold stock of chains, steel shoes nuts & bolts to compliment the range. Whether the requirement is for a single pad or a complete track group, Duraline Plus is the product preferred by many of Europe's leading contractors.
